Professor INABA Akira
Dyrektor
Research Center for Structural Thermodynamics
Osaka University

Dear Akira,

I was very happy to visit Research Center for Structural Thermodynamics this year. It was 10 years ago that I visited for the first time the beautiful Toyonaka Campus of the Osaka University. I must say that I feel in Osaka like at home. All things that should remain unchanged remained unchanged during all these years. There are however many things in the Center that have changed substantially. Being a careful reader of the Annual Reports I was well informed about the research running there, still I was very much impressed. During my three month stay I had the chance to work together with Miyazaki san and I met many young persons. I strongly believe that the results that we obtained during my stay will be a good mark for our long collaboration that will last for the coming years. I should not forget to mention my meeting with Sorai san whom I have known for many years. Finally, I can not hesitate to say that at the end of my stay I had the chance to admire *sakura* in Toyonaka, Koen and Kyoto.

Please do accept my deepest sincerity and the best wishes for you and all colleagues in the laboratory.

Yours

Tadeusz Wasiutyński
