Professor Yasuhiro Nakazawa
Director
Research Center for Structural Thermodynamics
Graduate School of Science
Osaka University
Toyonaka, Osaka 560-0043, Japan

Dear Professor Yasuhiro Nakazawa,

I was happy to visit the Research Center for Structural Thermodynamics from 1 July-18 August 2013. I would like to take opportunity to express my appreciation for your taking care of our visit and my own stay.

I had opportunity in oral presentation for students of two my lectures: "Hybrid ferromagnet-superconductors nanosystems", "Nanotransistor" which reviewed current problems nanophysics.

Working in the Research Center I had possibility to finish with Prof. Nakazawa the paper "Condensation energy for a two-gap superconducting state in nanoparticles" where considered the thermodynamical properties of high quality nanoparticles of MgB_2 (Journal of Nanoparticles, 2013, 1-6).

It was great opportunity for me to meet and get to know other researchers and talk with well-known Japanese specialists: J. Akimitsu, S. Tajima, K. Yamaguchi, H. Nagao, A. Fujiwara. We had a lot of debate about the mechanisms and the pairing symmetry in organic superconductors with Dr. S. Yamashita. I also learned a lot about Japanese history, culture and cuisine. I was able to implement a cultural trip to Kyoto and Kobe.

Please do accept my deepest sincerity and the best wishes for you and all colleagues of your laboratory. I look forward to our future cooperation.

S. Kruchinin
