

Ms. Yuki Matsumura Was Honored as Student Travel Grants in Multiscale Phenomena in Molecular Matters 2019

Ms. Yuki Matsumura who is a first-year student in the Ph. D course of Department Chemistry has been honored as “Student Travel Grants” in Multiscale Phenomena in Molecular Matters (Multis) 2019 held from July 1st to 4th in Krakow, Poland. This Grant is supported by PROM program which promoting encouragement for Ph.D students working in academic area. She presented a poster on July 2nd evening with a title of “Mott criticality and glassy features of phonons induced by electron correlations in molecule-based superconductors studied by heat capacity measurements”. Many researchers visited her poster and she could have enjoyed discussion with people in various research areas.
