

The Seventh International Symposium on the New Frontiers of Thermal Studies of Materials

The Seventh International Symposium on the New Frontiers of Thermal Studies of Materials was held at the Tokyo Institute of Technology Suzukakedai Campus University Hall. This society is a symposium in fields related to material chemistry and thermodynamics. The feature of this symposium is called Atake Lecture, and the whole lecture is held as the opening lecture of the symposium. In this Symposium, there were 1 plenary lecture, 10 invited lectures, and 29 poster presentations. Dr. Takajo and Dr. Fujimura attended the presentation from the Research Center for Thermal and Entropic Science. Dr. Takajo gave an invited talk and Dr. Fujimura gave a poster presentation. The plenary lecture and invited lectures were valuable and interesting. There were many active questions from various directions regarding the presentations of the speakers, and the speakers felt eager to answer the questions and felt that the venue was actively discussed.
