

Professor Yasuhiro Nakazawa
Director of Research Center for Structural Thermodynamics
Graduate School of Science
Osaka University
Toyonaka , Osaka 560-0043 , Japan

Dear Professor Yasuhiro Nakazawa ,

I have now returned to Kiev and spending busy time to do numerous works waiting for me in the home institute. It was really a fascinating time for me and my wife to stay at the Research Center for Structural Thermodynamics from 20th September -31th October 2014. As everyone knows well, Osaka university is one of the centre of excellence of thermodynamic activity in the word. The adiabatic calorimetry started by Emeritus Prof. Syuzo Seki has nicely succeeded with people in the present RCST. The other excellent techniques for measuring tiny crystals were performed and I have enjoyed discussion on the symmetry of Cooper pairs in organic superconductors.

One of the aims of my second visit at RCST was to attend a series of thermodynamic conferences at the end of September. This time, I have attended the International Symposium on Structural Thermodynamic in memory of Prof. Syuzo Seki and also the 50th annual meeting of Japan Society of Calorimetry and Thermal Analysis. The ceremony at Osaka University Hall and the Banquet is still a good memory for me. The activity of thermodynamic research in Japan has impressed me very much. I appreciated the people in Osaka for giving me this opportunity.

The research on symmetry studies in organic systems is now underway with my collaborators in Kiev and we are going to publish the results in paper. The travels to Hokkaido to meet Prof. Y. Asano and that to Tokyo to discuss Prof. T. Tohyama were also fruitful time during the stay to promote our idea on the calculation model for organic systems.

Please do accept my sincere thanks for you and all colleagues of your laboratory and RCST. I look forward to our cooperation and meeting you again in Ukraine.

S. P. Kruchinin

A handwritten signature in black ink, reading "S. Kruchinin". The script is cursive and fluid, with the first letter 'S' being large and prominent. The signature is positioned below the printed name.
