Professor Yasuhiro Nakazawa
Research Center for Structural Thermodynamics
Graduate School of Science, Osaka University
Toyonaka, Osaka 560-0043, Japan

I would like to express my gratitude to you for the invitation and to the President of Osaka University for the kind acceptance of my three month visit at the Research Center for Structural Thermodynamics. It was a great pleasure to meet the people I knew from my first visit in 2006, while I was staying as a JSPS fellow in the Laboratory of Professor Kazuya Saito at the University of Tsukuba. My living quarters in the Toyonaka International House were very comfortable and it was great to know that if anything happens all is in good hands. Most importantly my visit was very fruitful from the scientific point of view. First of all, I distinctly remember the peaceful working conditions I enjoyed while preparing the manuscript *Calorimetric studies of octacyanometalate-based coordination polymers displaying long-range magnetic order* for the Hot Topic Issue of Current Inorganic Chemistry co-edited by you and Professor Michio Sorai. I would like to thank very much for the calorimetric measurements Professor Yuji Miyazaki did on the PPMS instrument for three samples of octacyanonitrate-based molecular magnets just during my stay there. Besides, he kindly agreed to perform the DSC and adiabatic measurements of two ionic liquids to test them for the presence of glassy transitions. I should also like to thank Professor Satoshi Yamashita for additional heat capacity measurements below 2 K performed on the homemade high-precision instrument. The data will give me valuable information about the low temperature magnetic contribution to the specific heat for the studied sample. I strongly believe that the results obtained will be a good mark for our collaboration. It was very important for me to present a lecture at the Half-Day Symposium of Structural Thermodynamics of Condensed Matter organized by you in the Department of Chemistry, Osaka University, and to discuss the results with the specialists.

This time in Japan thanks to the kind guidance of Yamashita-san I had the opportunity to visit the Osaka Castle and the remarkable Osaka Aquarium Kaiyukan, and to enjoy restaurants serving delicious Japanese cuisine in the city center. I would like to thank for the interesting meetings with the whole group to celebrate various occasions together. To attend them was a real privilege for me. Your kindness and hospitality will stay forever in my memory. Let me wish you and your colleagues many successes in your research.

Kind regards

Robert Pełka
